

Top 5 online tools for teachers

Teaching is a highly respectable profession. A teacher is regarded as a builder of the nation. He is supposed to look after his students for their academic tasks and guide them in every possible way to enhance their academic performance.

Teachers also take the help of various methods to assess the academic progress of their students. This includes exams, random class tests, and assignments. These methods really help teachers in evaluating the academic performance of individual students in their class and the class as a whole.

These methods also help them in assessing their teaching method and find out if something needs to be improved or added in their teaching method to improve the performance of their students. Sometimes students face difficulties to understand what their educator wants to ask or teachers face difficulties to understand the answers given by students.

This whole problem arises because of some simple issues which can be rectified easily. We recommend students to use some tools while working on their assignments. Teachers also need to get help from a list of tools to evaluate assignments submitted by students and to improve their writing as well.

We will discuss some great online tools for teachers which could help them in their daily activities and make it easier for them to evaluate the performance of their students. These tools are listed below:

Plagiarism Checker:

Teachers assign various assignments to their students during a semester or an academic year. These assignments are meant to get an insight about the knowledge of students regarding certain topics and their academic progress as well.

However, some students don't pay much attention to assignments and look for easier ways to accomplish the given task. This type of students looks for already available content regarding the topic from various sources and just copy and paste the articles.

This is simply plagiarism. Plagiarism is a bad and unappreciated practice. Plagiarism in academic tasks is actually a punishable offense. The majority of academic institutions worldwide have zero tolerance for plagiarism. In this type of situation, teachers are responsible to figure out plagiarism in assignments.

Teachers need some assistance to identify plagiarized content from assignments submitted by their students. There are plenty of online tools available online for this purpose. One very efficient tool for this purpose is plagiarism checker on the PrePostSEO website. Teachers can access this tool by simply going on this link <https://www.prepostseo.com/plagiarism-checker>. This would really help them in identifying plagiarism in assignments accurately.

Skype:

Skype is a really helpful tool for teachers. Suppose, if the teachers want to communicate with their students, educate them about specific topics and present something by showing their computer display online then skype is the right tool.

It provides the user with a secure and fast solution online. This is a great tool if a teacher wants to teach something which wasn't discussed in detail during class time or if there is a problem for students to

attend class physically. In short, Skype provides the necessary environment for teachers if they want to discuss something with their whole class.

Grammar Checker:

Grammar is the key to accurate communication. A teacher should ensure that his students are using the correct language in their assignments and other tasks. Correct use of [grammar](#) won't only make assignments more understandable but also help students further in their careers.

A teacher also needs to communicate properly. If he can't use grammar correctly while expressing his thoughts, he will be misunderstood. This misunderstanding might cause a problem for his students. Students might become unable to grab the main concept due to miscommunication.

Similarly, teachers also provide their notes to students. If poor grammar is used in the academic notes it might become hard to study. Thus, limiting the chances of students to get good grades. This whole set of problems can be rectified easily by the use of a tool.

The tool being discussed is **Grammar Checker**. A **Grammar Checker** lets you know about grammatical and punctuation mistakes in a given content. A great **Grammar Checker** to identify grammatical mistakes and rectify them is available online for free on the website of PrePostSEO.

You can upload the file you want to check for grammatical mistakes. You can also copy and paste the content directly. This tool will analyze the content and spot the grammatical mistakes. This **Grammar Checker** can be a really handy tool for teachers who wish to improve grammar skills and encourage the use of good grammar in assignments as well.

Readability Checker:

Another great tool for teachers is readability checker. Readability checker allows teachers to analyze the notes written by them on the basis of ease to read. This enables teachers to check out the readability index of content according to multiple criteria.

Low readability index of notes or preparatory material might cause problems for students and make them confused about certain concepts. To rectify this, teachers should analyze their content through a readability checker.

This would help them to prepare the notes using easy language which is understandable by their students. This would be helpful for teachers in making their notes understandable according to the level of their students.

You can use an efficient readability checker online for free. The readability checker also tells you which type of students would understand the content from primary to graduate level.

Typing Tutor:

The majority of students can't type swiftly while preparing any type of exam or notes. The reason behind this is they don't know the skill of typing. However, teachers can help them in enhancing the typing speed of their students.

Multiple online typing tutors allow teachers to create an environment that is only accessible by teachers and their students. This could help teachers in tracking the progress of assignments given to students and typing skills of students as well.

Final Words:

The responsibility of teachers is to make their students prepared for future outcomes. Teachers can take the help of various tools for this purpose. We have discussed some effective tools which could help teachers in ensuring quality education and preparing their students for the future as well. Hopefully, teachers would use this to make their students perform even better. We wish luck to teachers and their students!
